# 1 AMTAIR

## 2 Introduction

This is a book created from markdown and executable code.

See Knuth (1984) for additional discussion of literate programming.

Regular markdown and  $E = mc^2$  equations.

$$a = b + c \tag{2.1}$$

$$d = e * f \tag{2.2}$$

### 2.1 Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

### 2.2 Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

2

You can add options to executable code like this

4

The `echo: false` option disables the printing of code (only output is displayed).

More markdown.

## 3 Summary

In summary, this book has no content whatsoever.
